

# Holly Angell

*Senior Vice President of Construction, Engineering and Facilities*

Holly Angell is the Senior Vice President of Construction, Engineering & Facilities for 7-Eleven, Inc. She leads the strategy and execution to modernize 7-Eleven's brick and mortar customer experience by transforming construction, environmental and facility management. She is also responsible for the expansion of electric vehicle charging and improving the entitlements process.

Holly joined 7-Eleven from Hong Kong, where she most recently was the Global Leader for Store Development and Design Director for Dairy Farm International Holdings. Prior to Dairy Farm, she was the Senior Vice President of Store Development for Southeastern Grocers and a GM leading Construction, Engineering & Sustainability for Coles supermarket chain in Australia. Holly brings over 20 years of global and progressive experience in the retail sector to 7-Eleven. She holds a bachelor's in electrical engineering from Boise State University. She is based out of Dallas, Texas with her husband and two sons.
